

$$\frac{x^{\sigma-1}}{e^x - 1}$$

Singularität
bei 0

exponentieller
Abfall

x

The figure shows a graph of the function $\frac{x^{\sigma-1}}{e^x - 1}$ in the first quadrant of a Cartesian coordinate system. The horizontal axis is labeled x at its right end. The vertical axis has the function's formula written next to it. The curve starts at a very high point on the vertical axis, indicating a singularity at $x=0$, and then curves downwards, approaching the horizontal axis as x increases. The text 'Singularität bei 0' is placed in the upper left area of the graph, and 'exponentieller Abfall' is placed in the lower right area.
